Abemec

Abemec is a self-importing dealer of for instance Agrifac, Fendt, Joskin, Krone, Lemken, Massey Ferguson and Merlo. We have 18 establishments all over the Netherlands: 17 of them in the south of the country and 1 in the northern region. When a new tractor or machinery is purchased, often the used tractor or machine is traded in. These are gathered in our UTM Centre, to be sold from there.

UTM centre

With a 10,000 m² showroom complex, our UTM Centre is one of the biggest in the Netherlands. This is the heart of our export operation to various countries, both within and outside Europe. The entire process – from purchasing to and including delivery at the destination – can be arranged by Abemec. If desired, we can also arrange all of the administration of the necessary documents and the transportation.

Offer

The UTM Centre has an average of 80 tractors for sale, from 40 to 400 bhp. We also offer approximately 500 used tools and approximately 200 used accessories. You can view and evaluate all of the bargains on appointment. Tractors and machines can be purchased in their current state or be adapted in accordance with the purchaser's wishes.

Is it not possible for you to visit the UTM Centre?

We can also supply you with reliable information digitally! Check:
